                       ROMAN DELUGAN
                       DIETMAR FEISTEL
                       MARTIN JOSST

LOCATION:  VIENNA, AUSTRIA
FIRM OPENED:  1993
EMPLOYEES:  23

FIRM PHILOSOPHY
In contrast to other architectural philosophies, DMAA do not reduce this principle of hermetic language to a game in and of itself, but rather, they root it in their work with as many multivalent relationships between architecture and its contextual environment as possible, premiating the context of the building and the physical presence of its users.

HISTORY
DELUGAN MEISSL Architects has only been around for just over twenty years. The firm was founded by Elke Delugan Meissl and Roman Delugan in 1993. In 2004 they became DELUGAN MEISSL associated architects when they added Dietmar Feistel and Martin Josst as partners to the firm. They have won countless awards throughout their history as a firm. They were nominated to the Mies Van Der Rohe award in 2009 based on their Porsche Museum. The Porsche Museum won first place in a competition in 2005. They won first prize in Deutscher Umbaupreis for the House Ray 1 project.

PROJECT TYPE

COMPLETED PROJECTS

PORSCHE MUSEUM

LOCATION: Stuttgart, Germany
COMPLETION: 2009
BUILDING TYPE: Cultural

BUILDING TYPE + PROGRAM
This building is a museum dedicated to the Porsche automobile industry. The museum’s entrance includes a ramp that takes guests to a spacious exhibition area, where a large collection of Porsche models are shown for display.

BUILDING DESIGN INTENTIONS
The museum is intended to commemorate the history of the company with a display of models originating since the founding of Porsche in 1931. It appreciates the accomplishments of the corporation while presenting the diversity of the Porsche brand and the fascinating thrill of the models’ designs to Porsche fans and newcomers alike.
