

## Illinois Cyber Security Scholarship Program (ICSSP) Senior Thesis/Project Form

ICSSP Scholars must complete two semesters of research/project in their 2<sup>nd</sup> year (*scholars with only a one-year scholarship must complete this requirement during that year*) of the ICSSP program. The research project may vary depending on the student's background, expertise, and interest. However, the project must be on a Cyber Security related topic and the scope well defined so that it can be completed within one year for senior research thesis or by the end of each semester for projects. This project/thesis will be graded and students will be required to write/present on the research project at the end of the second semester.

**Brief Description of the Overall Research Project:**

**Description of the ICSSP Student Research Project:**

**Description of the Evaluation Process for Student's Research Progress:**
