

DESIGN DIALOGUES SPEAKERS SERIES

GEOFFREY C. BOWKER

Professor, Donald Bren School of Information and Computer Sciences
Director, Values in Design Laboratory
University of California, Irvine

THE DATA CITIZEN: NEW WAYS OF BEING IN THE WORLD

TUESDAY, SEPTEMBER 20 //4:00-5:30 PM

NCSA Auditorium //1205 West Clark Street, Urbana
Reception to follow. Free and open to the public!

Geoffrey C. Bowker is professor at the Donald Bren School of Information and Computer Sciences and Director of the Values in Design Laboratory at the University of California, Irvine. From 1993-1998, he was faculty at the University of Illinois at Urbana-Champaign's School of Information Sciences (formerly the Graduate School of Library and Information Science), and was a faculty affiliate of the National Center for Supercomputing Applications from 1998-1999. He currently co-directs the NSF-funded Council for Big Data, Ethics, and Society with researchers from across academia and the IT industry. He has published widely on the topics of information infrastructure, classification systems in distributed scientific collaborations, and the use of web and digital resources across disciplines.
