

Taleah Thomas

Response to Alder, LaMott , and Bradbury

In this essay there was not many revision suggestions listed. I fixed some grammar errors that was present. The majority of my revisions came from something I learned more about throughout the first semester in Rhet. To revise this essay I created a works cited page. This was one of the most valuable skills that I have learned in college. Regardless of what you are writing, you must cite your sources. When creating this critical response I was knew what a work cited page was and it purpose, but I did not fully know how to complete one. In addition to the work cited page, I learned how to in text cite and how to use signal words better. The first sentence of my critical response is a quote from Ralph Waldo Emmerson. When using Emerson quote I did not it or even signal that I was going to cite something. This could've been very confusing to the readers These three skills not only helps avoid plagiarizing, but it also helps you indicate to the reader that you are about to recite source material and when that source material ends.
