

ENG 598 WTG

STEM Writing: Practice/Pedagogy

Spring 2023

Fridays, 1-2:50pm

2 credit hours

In-person

Course Description

Practice writing for professional contexts & learn strategies for teaching writing.

Can be taken graded or as credit/no credit

Why take this course?

This course is designed for STEM graduate students with an interest in teaching writing or reflecting on their own writing practices across industry settings, publication, grant applications, and collaborative writing contexts. Whether you're a research group mentor, TA or future faculty member, this course aims to build confidence in giving feedback and assisting students with writing.

Course Topics

- The role of writing & communication in STEM
- Feedback & response practices
- Genre awareness
- Rubrics & assessing writing
- Teaching multilingual writers
- Collaborative writing
- Writing scientific abstracts & literature reviews
- Communicating research to the public
