“A Wrinkle in Time was almost never published. You can’t name a major publisher who didn’t reject it. And there were many reasons. One was that it was supposedly too hard for children. Well, my children were 7, 10, and 12 while I was writing it. I’d read to them at night what I’d written during the day, and they’d say, “Ooh, mother, go back to the typewriter!” A Wrinkle in Time had a female protagonist in a science fiction book, and that wasn’t done. And it dealt with evil and things that you don’t find, or didn’t at that time, in children’s books. When we’d run through forty-odd publishers, my agent sent it back. We gave up. Then my mother was visiting for Christmas, and I gave her a tea party for some of her old friends. One of them happened to belong to a small writing group run by John Farrar, of Farrar, Straus & Giroux, which at that time did not have a juvenile list. She insisted that I meet John any how, and I went down with my battered manuscript. John had read my first novel and liked it, and read this book and loved it. That’s how it happened.”

AWARDS

An allegorical fantasy in which a group of young people are guided through the universe by Mrs. Who, Mrs. Which and Mrs. What -- women who possess supernatural powers. They traverse fictitious regions, meet and face evil and demonstrate courage at the right moment. Religious allusions are secondary to the philosophical struggle designed to yield the meaning of life and one's place on earth. Young Meg's willingness to face IT in the form of a black east in order to save a dear friend is one sign of her growing awareness. Readers who relish symbolic reference may find this trip through time and space an exhilarating experience the rest will be forced to ponder the double entendres. (Kirkus Reviews, March 1, 1962)
